Questions & Answers:

1 Why only Kimberly-Clark Gloves?

The gloves are processed into a raw material that is used in the manufacture of eco-friendly products like park benches, recycled lumber, and trash containers. Raw materials must come from a known formulation of gloves. Each glove manufacturer has their own proprietary glove formulation so we cannot accept other brands within the recycling program. For samples of Kimberly-Clark gloves, please contact Giang Nguyen at: giang.nguyen@kcc.com

2 Can you recycle other materials like latex and blended gloves?

No. Right now, only nitrile is accepted.

3 Will you accept bio hazardous soiled gloves?

No. You can RIGHTCYCLE* any gloves that are currently going into landfill. If the gloves are considered hazardous waste, you will continue to dispose of them per your SOP's and they are not accepted.
